

How to make snapology origami strips out of tetrapacks

For Snapology Origami tutorials, please see David Honda's webpage: [Snapology Icosahedron Presentation \(Google Slides version\)](#)

1. Flip the sides up

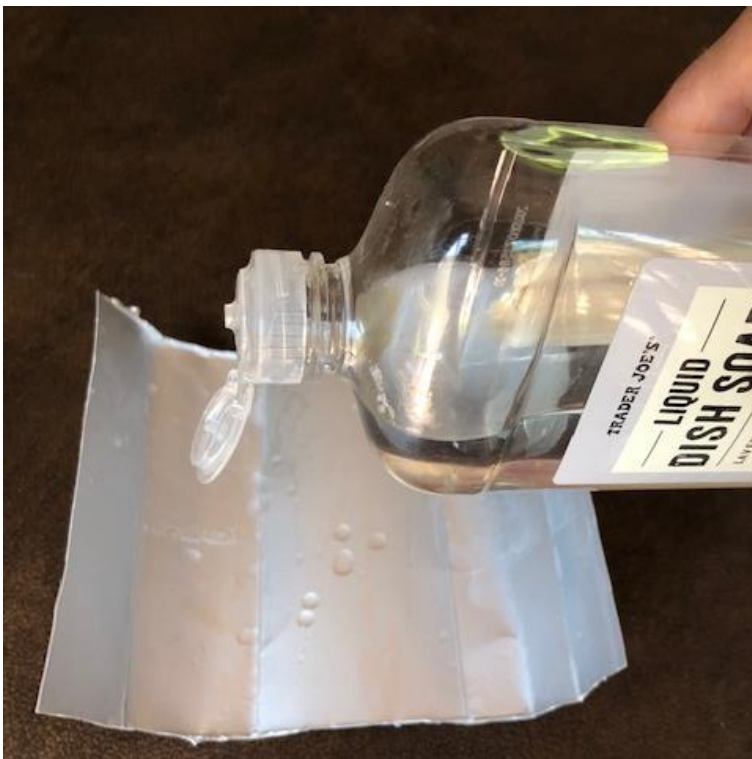

2. Flatten pack and cut off top and bottom along creases.

3. Throw away the top and bottom.

4. Cut open the pack along the seam on the back side.

5. Clean the pack by pouring a few drops of dishwashing liquid and washing with warm water.

6. Wait till it dries.

7. Start by cutting off the part where the pack was glued. 8. Cut into strips of desired thickness.
