

Paper Magic Wallet Template and Instructions

Print this template on 60 lb or heavier cardstock

1. Cut out the shape along its boundary and cut out the checkered square in the middle.
2. Fold along mountain and valley folds according to the origami notation below. Cut and folded lines may not always align. This is part of the design of this wallet.
3. Glue or tape the shaded trapezoids together.
4. The three bold segments will be approximately collinear at this point. Fold back and forth along the bold black line that runs down the middle of your rectangular wallet.

Note: This version of the magic wallet is adapted from the book *Flexagons Inside Out* by Les Pook. It is intended only as a quick introduction to the magic wallet. For a more classic, sturdier magic wallet, download [Alexey Ivchenko's interpretation](#) of a centuries-old design.
